Ideation Phase
Empathize & Discover

Date	02 October 2026
Team ID	SWTID-2026-9088
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Project Empathy Map – Employee Data Import

Primary User: ServiceNow Administrator / Employee Data Manager

THINK & FEEL

- Wants employee data to be accurate and complete.
- Wants imports to be quick and repeatable.
- Worries about duplicate or incorrect employee records.
- Wants confidence that existing records are updated correctly.

HEAR

- Requirements for employee-data import.
- Feedback about incorrect or duplicate records.
- Need for consistent employee information.

USER

- ServiceNow Administrator / Employee Data Manager
- Responsible for importing and maintaining employee records.

SEE

- Employee spreadsheet columns.
- Import Set and transformed records.
- Employee Test table.
- Reports and dashboard.

SAY & DO

- Prepare the employee spreadsheet.
- Upload/import the data into ServiceNow.
- Check field mappings and transform results.
- Verify inserted and updated records.
- Review reports and the Employee Analytics Dashboard.

PAIN

GAIN

• Manual entry is time-consuming. • Incorrect mapping can produce bad data. • Repeated imports may create duplicates without proper matching. • Difficult to monitor data without reports.	• Faster employee-data migration. • Consistent field mapping. • Duplicate prevention through Coalesce. • Easier validation of imported records. • Centralized employee analytics.

Project insight: The user needs a reliable spreadsheet-to-ServiceNow process that maps fields correctly, updates existing employees without creating duplicates, and makes the resulting employee data easy to validate and monitor.
