User Acceptance Testing (UAT)

Import Data using Transform Maps (Spreadsheet)

Date	02 October 2026
Team ID	SWTID-2026-9088
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Project Overview

Project Description: A ServiceNow solution for importing employee information from a spreadsheet through an Import Set and Transform Map into the Employee Test target table, with Coalesce-based record matching and reporting/dashboard visibility.

Project Version: 1.0

Testing Period: 03 October 2026 (implementation video evidence)

Testing Scope

The UAT scope covers the functions visibly demonstrated in the submitted implementation video: source spreadsheet data, Employee Test records, Import Set/Transform Map execution, transformed target records, employee reporting, and the Employee Analytics Dashboard.

Testing Environment

URL/Location: ServiceNow instance used for the project.
Credentials: Not documented in this UAT report.

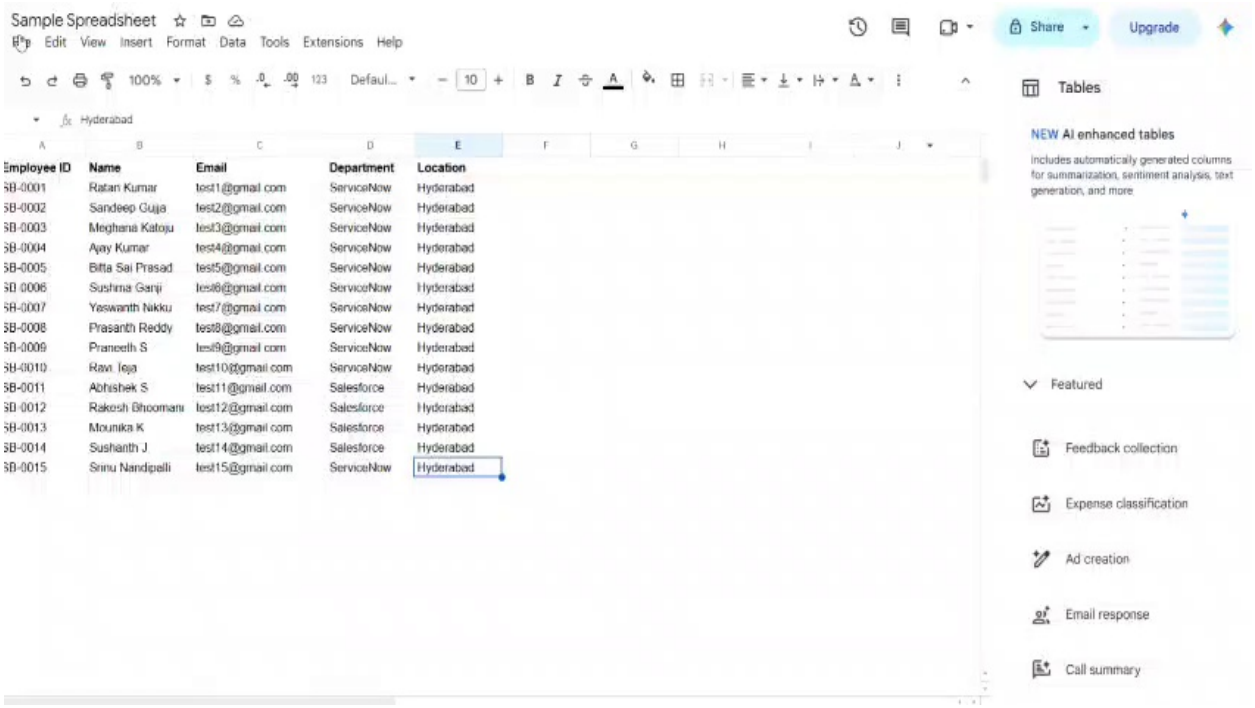

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify employee source spreadsheet	1. Open the prepared employee spreadsheet. 2. Check Employee ID, Name, Email, Department and Location fields. 3. Confirm employee rows are populated.	The spreadsheet contains structured employee source data with the required fields.	The video shows the Sample Spreadsheet with employee IDs, names, emails, departments and locations populated.	PASS
TC-002	Verify Employee Test target data	1. Open Employee Tests. 2. Review the employee list. 3. Check the target fields and record count.	Employee Test displays transformed employee records in the target table.	The video shows Employee Tests with employee records displayed. The list shows 16 records before the transformation sequence.	PASS
TC-003	Run the Transform Map	1. Select the Employee Import Set. 2. Select the configured Transform Map. 3. Click Transform. 4. Wait for transformation to complete.	The selected Transform Map runs successfully and processes the imported spreadsheet data.	The video visibly shows the 'Specify Import set and Transform map' screen with the Employee Import set and selected map, followed by the Transform action.	PASS
TC-004	Verify transformed Employee Test records	1. Return to Employee Tests after transformation. 2. Review the employee records. 3. Check that the imported fields are populated.	Transformed employee records are available in the target Employee Test table.	The video shows 17 Employee Test records after the transformation, including Employee ID, Employee Name, Email, Department and Location.	PASS
TC-005	Verify employee report	1. Open the Employees by Location report. 2. Run/view the report. 3. Review the location counts.	The report displays employee counts grouped by location using Employee Test data.	The video shows the Employees by Location report with Hyderabad = 16 and Chennai = 1.	PASS
TC-006	Verify Employee Analytics Dashboard	1. Open Employee Analytics Dashboard. 2. Review Employee List, Employees by Location and Employees by Department widgets. 3. Verify displayed values.	The dashboard loads the configured employee analytics widgets and presents the imported data.	The video shows the dashboard with all three widgets. Department values shown are ServiceNow = 11, Salesforce = 4 and Aiml = 2; the location chart shows Hyderabad = 16 and Chennai = 1.	PASS

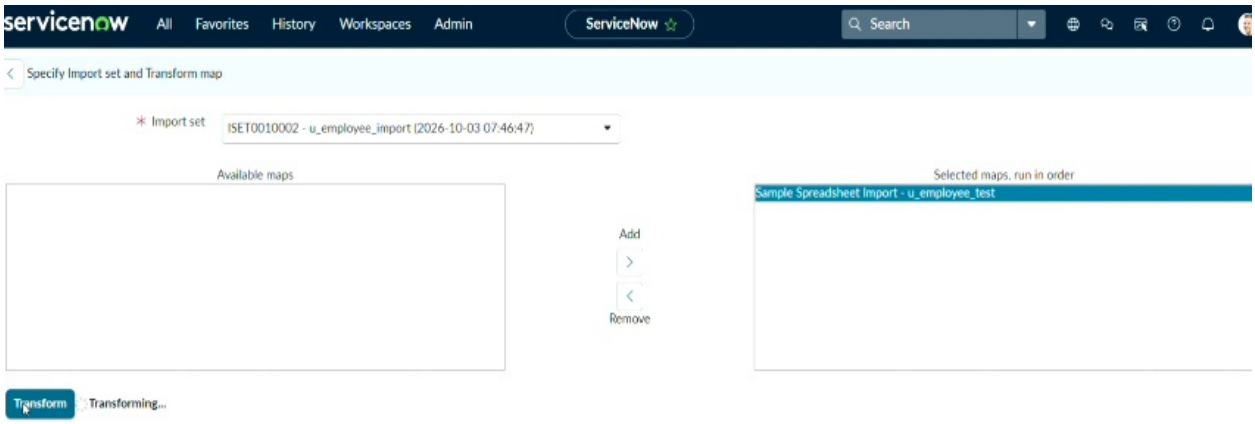

Evidence note: The PASS results above are limited to behavior visibly demonstrated in the uploaded implementation video. Coalesce/update-existing behavior is not independently proven by the video and is therefore not claimed as a separate passing UAT result here.

Video Evidence

Selected screenshots from the submitted video are included below as evidence for the corresponding UAT cases.

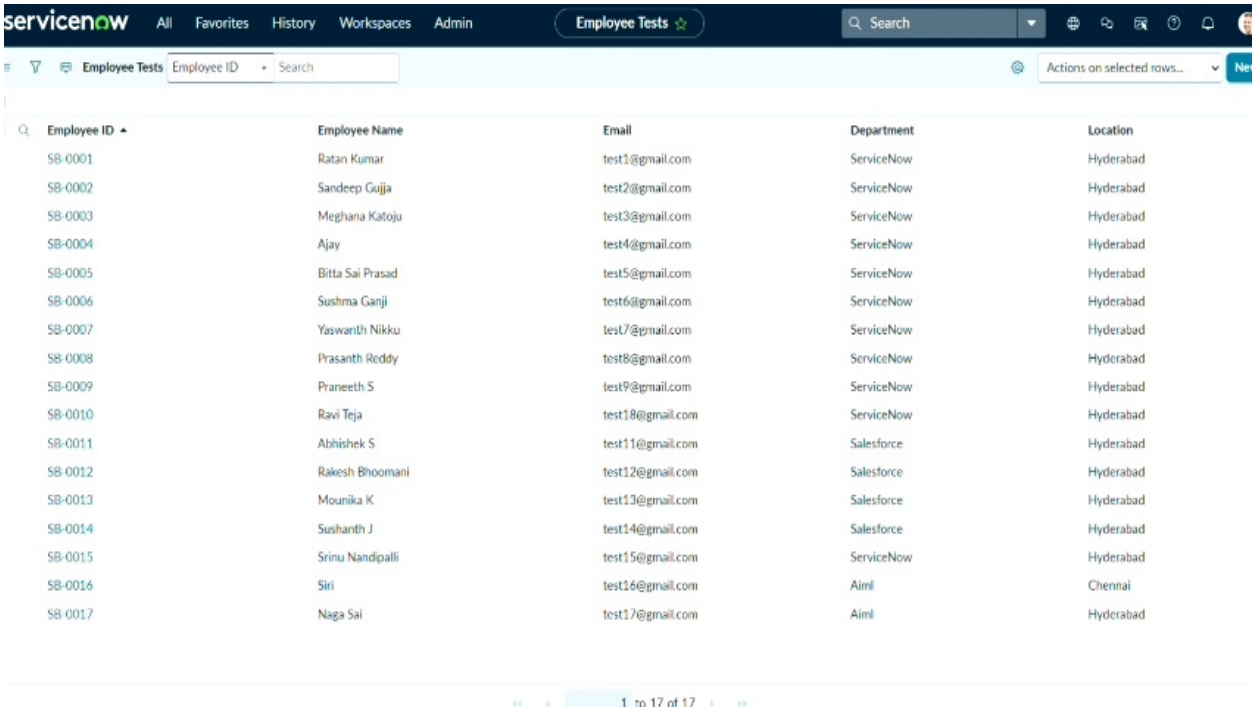

Evidence for TC-001 — Sample Spreadsheet containing Employee ID, Name, Email, Department and Location.

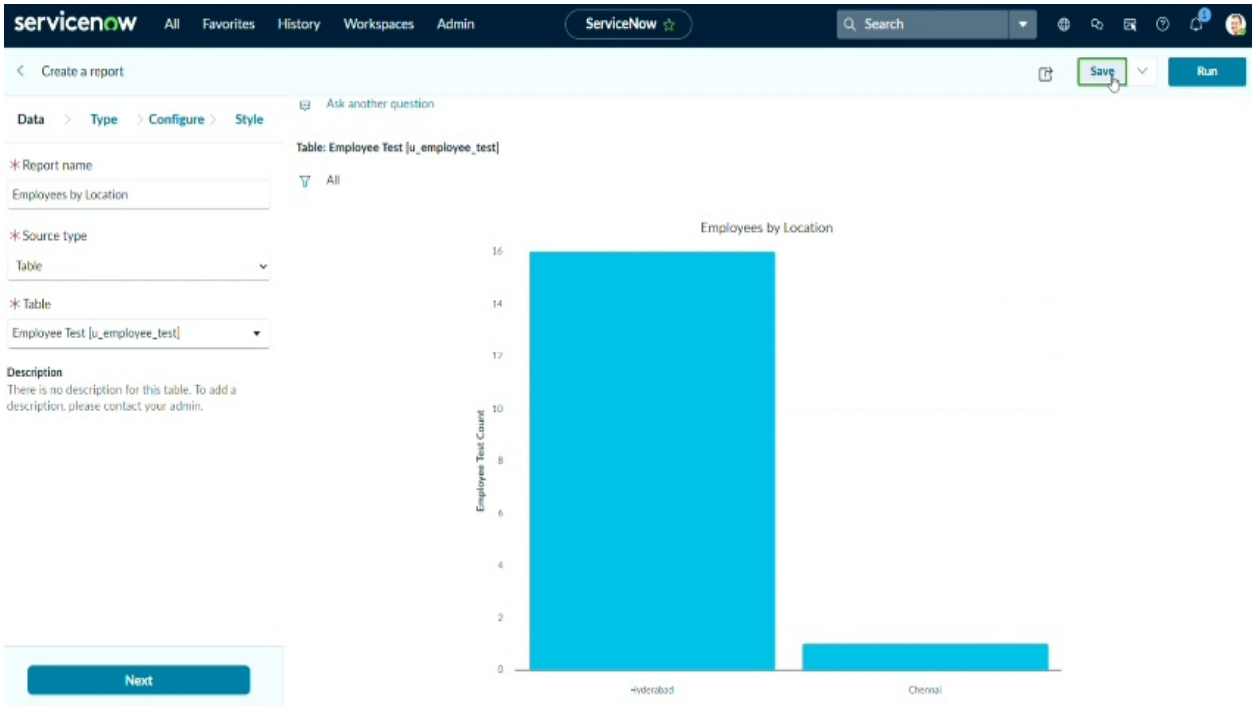

Evidence for TC-003 — ServiceNow Import Set and selected Transform Map ready for transformation.

Target Records & Reporting Evidence

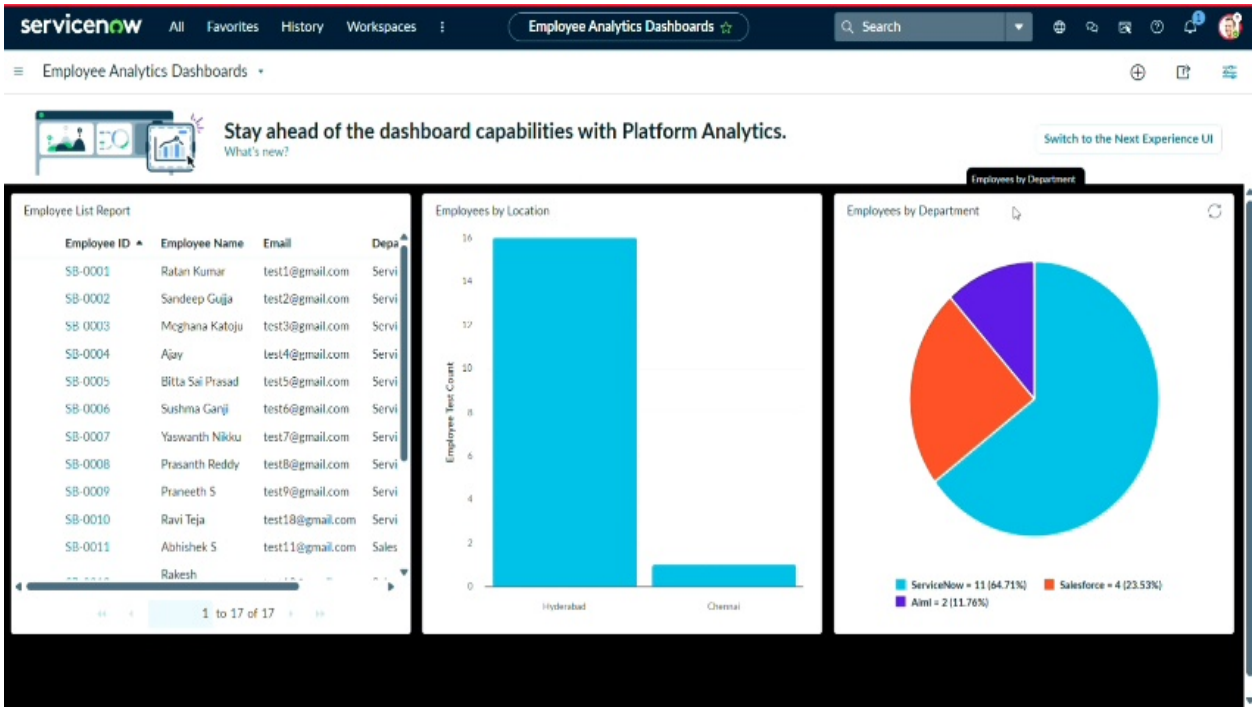

Evidence for TC-004 — Employee Test table after transformation; the list shows 17 records.

Evidence for TC-005 — Employees by Location report showing Hyderabad and Chennai counts.

Dashboard Evidence

Evidence for TC-006 — Employee Analytics Dashboard showing Employee List, Employees by Location and Employees by Department.

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No defect was visibly identified in the submitted implementation video.	Not applicable — no reproducible defect was demonstrated.	—	No bug observed	UAT evidence shows the documented import, target records, report and dashboard workflow operating as demonstrated.

Sign-off

Tester Name	To be completed by tester
Date of Test Completion	To be completed
Signature	To be completed
Project Manager Sign-off	To be completed
Product Owner Sign-off	To be completed

UAT note: The template requires both positive and negative scenarios. The submitted video provides evidence for the positive/functional scenarios above, but it does not demonstrate a failed import or other negative test. A negative test should be executed and added before final sign-off if the evaluator requires explicit negative-scenario evidence.
